1. Number and ratio of stillbirths and perinatal deaths in 2005 may differ from previously published data due to revisions in the database.
  2. In 2003, a question on pregnancy status among females aged 10-54 was added to the Idaho death certificate resulting in the identification of more maternal deaths. Maternal death data for 2003 and after are not comparable with data prior to 2003.
  3. Marriage, divorce, and specified abortion data are for events occurring in Idaho; all other data reflect events occurring to Idaho residents.
- Note: All rates are per 1,000 unless otherwise stated; see Definitions and Formulas for specific rates and ratio definitions.
