Skill Sheet Long Board -- EMR

Skill	Pass	Needs Improvement (Please comment)
1. Takes, or verbalizes, body substance isolation precautions		
2. Directs assistant to place and maintain head in the neutral in – line position		
3. Assesses motor, sensory and circulatory function in each extremity		
4. Applies appropriately sized extrication collar		
5. Positions the immobilization device appropriately		
6. Directs movement of the patient onto the device without compromising the integrity of the spine (log roll)		
7. Applies padding to voids between the torso and the board as necessary		
8. Secures the patient's torso to the device		
9. Secures the patient's legs to the device		
10. Secures the patient's head to the device		
11. Secures the patient's arms		
12. Reassess motor, sensory and circulatory function in each extremity		
Total Steps Passed		

Critical Criteria (Automatic Fail)

- _____ Did not take or verbalize Body Substance Isolation
- _____ Did not direct or take manual immobilization of the head
- _____ Moved patient in a way the compromised the integrity of spine
- _____ Did not reassess motor, sensory, and circulatory function after immobilization
- _____ Ordered release of manual immobilization before it was maintained mechanically
- _____ Patient secured in such a way that allows excessive movement to cause potential spinal compromise
- _____ Did not immobilize head securely in neutral position
- _____ Immobilized head before torso
- _____ Did not complete station in 10 minutes

Final Score (circle one)	Pass	Fail
